- Lake

Landscape

Landscape was mapped according to the polygons delineated by the CAVM mappers (see front map of vegetation physiognomy for list of mappers by region). The determination of classes was based on the data available for each region, including maps of landscape, topography and surface geology.

<http://www.geobotany/uaf.edu/cavm/>

Map is designed to print at full scale on both B (11x17") and A3 (297x420 mm) sized paper. The outer most neat line measures 249 x 390 mm when the map is plotted at full size.
